

Comparison of Part-Time Faculty Compensation for SMCCCD and Bay 10 Districts

Based on teaching one 3-unit class

Notable findings:

SMCCCD Part-Time faculty salaries are *significantly behind* other Basic Aid districts and in the **bottom half** of all Bay 10 districts

- **Marin, West Valley/Mission, San Jose/Evergreen, CCSF, Foothill/DeAnza** all have PT salary schedules in which PT faculty are paid a set **pro-rata percentage of FT salaries** (referred to as a “**parity percentage**”) for equivalent experience and education, using **load-based** salaries on schedules that are similar to FT schedules (referred to as “**mirrored**” schedules) by including **columns** that provide added compensation for added educational levels.
- **Chabot’s** PT faculty are paid a set **parity percentage of FT salaries** (72%) for equivalent experience and education using **load-based** salaries.
- **Peralta’s** PT salaries have **high parity percentages--up to 100% of comparable FT faculty** for those at the bottom of the scale and they have a **fully “mirrored” PT salary schedule (with columns for added education.)**
- **Contra Costa** has a PT salary schedule with seven **columns** that provide added compensation based on educational levels and a parity plan to shift PT faculty to load-based pay at 72% of FT salaries by 2021-22 and 80% by 2022-23.
- **Ohlone’s** PT salary schedule has three **columns** that provide added compensation for additional educational levels and the district has “committed to improving the total compensation for part-time faculty.”

SMCCCD is the only Bay 10 district that has NOT formally addressed Part-Time Parity (either in the actual salary schedule or in setting a goal to improve PT salaries)

SMCCCD does NOT pay PT faculty **load-based** salaries. **SMCCCD** continues to pay PT faculty **by the hour**.

SMCCCD does NOT pay PT faculty on a **mirrored salary schedule with columns**. Columns provide additional compensation based on educational levels, as all FT schedules do.
